2010

Low Noise Autoranging Multimeter $7\frac{1}{2}$ -Digit

The 7¹/₂-digit Model 2010 Low Noise Multimeter combines high resolution with the high speed and accuracy needed for production applications such as testing precision sensors, transducers, A/D and D/A converters, regulators, references, connectors, switches, and relays. Based on the same high speed, low noise A/D converter technology as the Models 2000, 2001, and 2002, the 2010 is the latest addition to Keithley's Series 2000 line of high performance digital multimeters.

High Measurement Flexibility

The 2010 has 15 built-in measurement functions, including DCV, ACV, DCI, ACI, $2W\Omega$, $4W\Omega$, dry circuit resistance, temperature (with either thermocouples or RTDs), frequency, period, ratio, continuity measurement, and diode testing. This multi-functional design minimizes added equipment costs.

- 7½-digit resolution
- 100nV rms noise floor
- 7ppm DCV repeatability
- Built-in 10-channel scanner mainframe
- Dry circuit and low power measurement mode
- 15 measurement functions including support for RTD and thermocouple temperature measurements
- **Built-in ratio measurement** function

Ordering Information

2010 Autoranging DMM

Extended warranty, service, and calibration contracts are available.

Model 1751 Safety Test Leads, User Manual, Service Manual

Unique Resistance Measurement Functions

with Keithley's Series 7000 switch matrices and cards.

Characterizing the resistance, linearity, or isolation of contacts, connectors, switches, or relays completely and efficiently demands an uncommon combination of ohms measurement capabilities. The 2010 offers:

2001-TCSCAN scanner card into the option slot in the 2010's back panel. This "plug-in" approach

eliminates the need for a separate scanner and significantly reduces programming and setup time in applications involving a limited number of test points. For larger applications, the 2010 is compatible

- A low-bower obms measurement mode. Low-level resistance measurements can be made with source current as low as 100μ A, an order of magnitude lower than is possible with other DMMs, so device self-heating is minimized. Among other benefits, this low-power measurement capability makes the 2010 suitable for end-of-life contact testing per ASTM B539-90.
- A dry circuit test function. When measuring contact and connector resistances, it is important to control the test voltage carefully in order to avoid puncturing any oxides or films that may have formed. A built-in clamp limits the open circuit test voltage to 20mV to ensure dry circuit conditions.
- An offset compensated ohms function. This function eliminates thermal effects that can create errors in low-level resistance measurements in system environments.
- An extended obms measurement capability. The 2010 provides a 10Ω range for more precise measurements of low resistances.

Optional Multiplexer Cards

Creating a self-contained multipoint measurement solution is as simple as plugging a scanner card into the option slot on the 2010's back panel. This approach eliminates the complexities of triggering, timing, and processing issues and helps reduce test time significantly. For applications involving more than 10 measurement points, the 2010 is compatible with Keithley's Series 7000 switch matrices and cards.

Model 2000-SCAN Scanner Card

- Ten analog input channels (2-pole)
- Configurable as 4-pole, 5-channel

ACCESSORIES AVAILABLE

TEST LEADS	
5804/5/6	4-Wire/Kelvin Test Lead Sets
SWITCH/SCA	INNER CARDS
2000-SCAN	10-Channel Scanner
2001-TCSCAN	9-Channel Thermocouple Scanner
CABLES/ADA	APTERS
7007-1	Shielded IEEE-488 Cable, 1m (3.3 ft)
7007-2	Shielded IEEE-488 Cable, 2m (6.6 ft)
7009-5	RS-232 Cable
RACK MOUN	іт кітз
4288-1	Single Fixed Rack Mount Kit
4288-2	Dual Fixed Rack Mount Kit
OTHER	
KPCI-488	IEEE-488 Interface/Controller for the PCI Bus
KUSB-488	IEEE-488.2 USB-to-GPIB Interface Adapter

TEMPERATURE NOTES

1. For temperatures <-100°C, add ±0.1°C and >900°C add ±0.3°C.

2. Specifications apply to channels 2-6. Add 0.06°C/channel from channel 6.

Excluding probe errors.

GENERAL

POWER SUPPLY: 100V / 120V / 220V / 240V ±10%.
LINE FREQUENCY: 45Hz to 66Hz and 360Hz to 440Hz, automatically sensed at power-up.
POWER CONSUMPTION: 22VA.
OPERATING ENVIRONMENT: Specified for 0°C to 50°C. Specified to 80% R.H. at 35°C.
STORAGE ENVIRONMENT: -40°C to 70°C.
WARRANTY: 3 years.
SAFETY: Designed to IEC-1010-1.
EMC: Complies with European Union Directive 89/336/EEC (CE marking requirements), FCC part 15 class B, CTSPR 11, IEC 801-2, IEC 801-3, IEC 801-4.
VIBRATION: MIL-T-28800E Type III, Class 5.
WARMUP: 2 hours to rated accuracy.
DIMENSIONS:
Rack Mounting: 89mm high \times 213mm wide \times 370mm deep (3½ in \times 8% in \times 14% in).
Bench Configuration (with handle and feet): 104mm high × 238mm wide × 370mm deep
$(4\frac{1}{8} \text{ in } \times 9\frac{3}{8} \text{ in } \times 14\frac{3}{6} \text{ in}).$
SHIPPING WEIGHT: 5kg (11 lbs).
VOLT HERTZ PRODUCT: $\leq 8 \times 10^{7}$ V·Hz.
